VISTA PROJECTS CELEBRATES 25 YEARS OF ENGINEERING EXCELLENCE

Calgary-based engineering firm has been providing quality engineering solutions since 1985

June 1, 2010 (**Calgary, AB**) - Vista Projects Limited (Vista), a multi-discipline, technical engineering firm celebrates its 25th anniversary today. Vista specializes in oil sands, heavy oil, and conventional oil and gas processing projects in the energy sector. Vista's lengthy experience and proven expertise have made them a leader in the consulting engineering industry.

"Twenty five years is a significant milestone for us," says Alex Campbell, Founder and Principal of Vista Projects. "We are still working with some of the clients we did in 1985, and I think that is the secret to our success – we continue to perform efficiently and exceed our clients' expectations project after project. We are very proud of what we have accomplished and look forward to continuing to build our organization as one of the premier engineering firms in Western Canada."

Vista opened its doors in 1985 with three employees and has since expanded into a company of more than 200 personnel. Most recently, Vista has capitalized on its expertise in Steam Assisted Gravity Drainage (SAGD), Cyclic Steam Stimulation (CSS) to design several major bitumen recovery projects in the Alberta oil sands.

In 2010, Vista announced that its Quality Management System (QMS) had been ISO 9001:2008 certified. Vista's QMS implementation includes systems for engineering, procurement and project management services.

Vista's track record of success can also be marked by its commitment to investing in its people. Earlier this year, Vista was recognized as one of the Top 10 Best Small & Medium Employers in Canada. The organization understands the intricate relationship between employee satisfaction and customer satisfaction and has built a workplace culture to support its philosophy. Vista is one of the few privately-held organizations that believes in and shares ownership opportunities with its own employees.

About Vista Projects Limited

Vista Projects Limited (www.vistaprojects.com) is a multi-discipline, technical engineering firm providing solutions to energy firms in Western Canada. While Vista has been active in all aspects of the oil and gas market, it has grown to become a leading engineering firm for thermal energy projects, working on some of the most successful in-situ heavy oil projects in the Alberta oil sands.
