

FOR IMMEDIATE RELEASE

**VISTA PROJECTS ANNOUNCES ISO 9001:2008 CERTIFICATION FOR ITS
QUALITY MANAGEMENT SYSTEM**

Leading engineering company invests to enhance operational efficiency and effectiveness

March 24, 2010 (Calgary, AB) – Vista Projects Limited (Vista), a leading multi-discipline Calgary-based technical engineering firm, is pleased to announce their quality management system has been ISO 9001:2008 certified, covering quality management systems for engineering, procurement and project management services for the energy industry.

“Vista invested significantly in building a robust management system to enhance our operational efficiency and effectiveness,” says Alex Campbell, Principal and Founder of Vista Projects. “We believe that efficient processes and capable personnel lead to satisfied clients. In order to improve on all of these areas, Vista developed a superior quality management system to assist with expanding the operations of the company.”

The ISO 9001:2008 certification is internationally recognized and ensures the company's operations are consistent and comply with the standard.

About Vista Projects Limited

Vista Projects Limited (www.vistaprojects.com) is an ISO 9001 certified, multi-discipline, technical engineering firm providing solutions to energy firms in Western Canada. While Vista has been active in all aspects of the oil and gas market, it has grown to become a leading engineering firm for thermal energy projects, working on some of the most successful in-situ heavy oil projects in the Alberta oilsands. The company was recently named a top 10 small and medium employer in Canada and one of Alberta's best workplaces.

About ISO

ISO (International Organization for Standardization) is the world's largest developer and publisher of International Standards. ISO is a network of the national standards institutes of some 159 countries, with a Central Secretariat in Geneva, Switzerland, that coordinates the system. More than 100 of ISO's members are from developing countries. ISO has more than 18, 000 International Standards in its current portfolio. ISO's work programme ranges from standards for traditional activities, such as agriculture and construction, through mechanical engineering, manufacturing and distribution, to transport, medical devices, the environment, safety, information and communication technologies, and to standards for good practice and for services. ISO launches the development of new standards in response to the sectors that express a clearly established need for them.
